Important:

- Based on the proportionate size of any given image, it is nearly impossible to print an image in an exact location. These sizes you are requesting can only be approximate. However, we will notify you as to the finished dimensions of your image on the shade before printing.
- All shades with custom printing must have a worksheet with each shade.
- Images must be in at least 150 DPI for finished print size.
- Image sizes requested are based on fabric width — not window opening size.

We cannot reproduce images that are proprietary, trademarked, copyrighted, or forbidden by law!
